The Difference is Engineered Quality

Work Benches

R.F.MOTE

Work Benches - Cabinet and Open Type

Established in 1966, R. F. MOTE is a prominent manufacturer of custom metal and light structural steel products. As such, we manufacture a standard line of work and assembly benches, custom engineered to best facilitate the end use. We use standard components assembled in any desired arrangement. The units, Cabinet Type, Open Type, or a combination of both can be equipped with drawers, cupboards, shelves (fixed or adjustable), back stops, risers, electrical outlet strips, power bars, EIA racks, or enclosures and any of a variety of work surfaces. All Work Benches are fully welded and powder coated in the color of your choosing.

Typical applications for our Work Benches include educational institutes, automotive repair centres, machine shops, pharmaceutical laboratories, electronics repair facilities, manufacturing facilities, assembly lines, and product testing facilities.

Cabinet Type Work Bench

Open Type Work Bench

Work Benches - Cabinet and Open Type
